IDC Retail Insights: Asia/Pacific Retail Digital Transformation Strategies

Traditional retailers need to change their business models and engage customers across multiple touch points to deliver an exceptional customer experience and stay profitable. The IDC Retail Insights: Asia/Pacific Retail Digital Transformation Strategies research advisory service provides insights into the key dimensions of retail digital transformation and enables retailers to mitigate transformation risks associated with business transformation. The advisory service helps accelerate a retailer's journey to a digital enterprise and examines the impact of technology investment on supply chain, merchandising, marketing, store operations, omni-channel, and customer experience — with an emphasize on digital technology adoption and optimal transformation of the business to achieve business innovation and efficiency. It also includes regional-level estimates on technology spending in the retail market, competitive assessments of IT vendors, and continuous monitoring of the retail market aimed at identifying key business and technology investment trends.

Approach

This advisory service develops unique market analysis and comprehensive data through IDC Retail Insights' proprietary research projects, along with ongoing communications with industry experts, retail executives, and technology vendors and complemented by secondary research from conferences, publications, and third-party news sources. To ensure relevance, our analysts work with subscribers to identify and prioritize specific topics to be covered in research reports. Our analysts also provide personalized digital transformation advisory services for retail executives to help them make better-informed decisions.

Topics Addressed

Throughout the year, this service will address the following topics:

- Retail digital transformation and key components
- Retail market trends, technology requirements, and investment directions
- IT budget dynamics and vendor selection criteria
- Country-level retail insights across APEJ
- Technology investment outlook for new and emerging digital technologies
- Coverage of the major players in both online and offline commerce across the region
- Retail market structure and key performance indicators
