

Japan IT Security Strategies (Japanese Version with Key English Language Reports)

AN IDC CONTINUOUS INTELLIGENCE SERVICE

Internet-related businesses are growing rapidly in Japan because of the availability of high-speed, low-cost broadband networks. However, issues including APT attacks, data leakages, credit card frauds, and compliance still persist. IDC's *Japan IT Security Strategies (Japanese Version with Key English Language Reports)* analyzes the evolving IT security market in Japan, including security hardware, software, and services. This service provides in-depth and detailed analyses of IT security product vendors, service providers, and end users with market forecasts, product trends, vendor strategies, and vendor rankings. In addition, this service provides enhanced coverage of the IT security services market. In 2022, this service will enhance several researches to the information governance and compliance markets such as Data Privacy management.

Markets and Subjects Analyzed

- Security software
