

Canadian Consumer Communications Services

AN IDC CONTINUOUS INTELLIGENCE SERVICE

IDC's *Canadian Consumer Communications Services* is a subscription-based program focused on understanding the opportunities and marketing around connected and mobile communications services, devices, and technologies to Canadian consumers. The program also discusses current consumer trends that potentially shape the consumer services and technologies markets. It includes timely updates, survey data, marketing insights, and forecasts essential to product managers and marketers for near-term planning and long-term outlook. This program can be delivered in multiple formats or presentations.

Markets and Subjects Analyzed

- Technology and service adoption, usage, and consumer perspective
- Consumer behavior and consumer segmentation
- Marketing-connected consumer services and devices to Canadians, top purchase drivers, and product attributes
- Smart (connected) home services and devices
- Consumer wireline (internet, home phone) and wireless services
- Consumer TV services and over-the-top (OTT) video services
- Wearables, personal (connected), and mixed reality technologies
