

IDC Retail Insights: Worldwide Retail Intelligent Product Merchandising and Marketing Strategies

IDC Retail Insights: Worldwide Retail Intelligent Product Merchandising and Marketing Strategies advisory service examines best practice, trends, market conditions, retailers' concerns, and vendors' offerings to provide authoritative advice on investment, life-cycle management, and use of analytics in core retail processes — merchandising, marketing, and customer management. It examines early-stage technologies such as machine learning and other artificial intelligence (AI) technologies to guide early adopters as well as later-stage technologies to support application portfolio rationalization. Our efforts are focused on helping retailers spot and prioritize opportunities, save time, minimize cost, and mitigate risk. Specific attention is given to the drivers, benefits, processes, uses cases, and best practices related to omni-experience customer engagement, digital supply chain optimization, and curated merchandise life-cycle management.

Approach

IDC Retail Insights: Worldwide Retail Intelligent Product Merchandising and Marketing Strategies global analyst team keeps in constant touch with retail CIOs and their staff, line-of-business executives, and product strategy executives of leading technology vendors. We develop deep and comprehensive perspectives to provide actionable recommendations. Our methods include in-depth interviews, quantitative and qualitative market research, and secondary research from conferences, publications, blogs, online communities, and traditional news sources.
