

Central and Eastern Europe, Middle East and Africa 3D Printing

AN IDC SPECIAL INTELLIGENCE SERVICE

Central and Eastern Europe, Middle East and Africa 3D Printing examines the explosive market opportunity around 3D printing and the ability to create physical objects and shapes in a unique print environment. Market sizing and forecast data is included. This research also provides deep insight into the potential disruption to traditional manufacturing and the healthcare industry and analyzes the benefits, challenges, and opportunities inherent in deploying 3D printing technology across the region.

Markets and Subjects Analyzed

- 3D printer market sizing and forecast for Central and Eastern Europe, the Middle East, and Africa (CEMA)
- 3D printing opportunities in manufacturing
- 3D printing opportunities in healthcare
- 3D printing opportunities in education

Core Research

- Middle East and Africa 3D Printer Market Analysis, 2019
- Middle East and Africa 3D Printer Market 2019–2023 Forecast
- Central and Eastern Europe 3D Printer Market 2019–2023 Forecast
- Middle East and Africa 3D Printing Market 2019–2023 Forecast
- Central and Eastern Europe, Middle East, and Africa 3D Printing Market Opportunities in Manufacturing, 2019

In addition to the insight provided in this service, IDC may conduct research on specific topics or emerging market segments via research offerings that require additional IDC funding and client investment.
