

Japan Applications and Customer Experience Strategies (Japanese Version with Key English Language Reports)

AN IDC CONTINUOUS INTELLIGENCE SERVICE

The *Japan Applications and Customer Experience Strategies (Japanese Version with Key English Language Reports)* service includes the unified communications (UC), collaborative workspace (collaboration and contents management), CRM, enterprise applications (EA), and customer experience (CX) market in Japan. IT users need real-time decision making because of the globalization of their business location and their increasing business flow. Also, an enterprise's need to improve workflow efficiencies, catch up customer's DX, and transform business is greater than ever. A UC/collaboration technology is valuable for solving business collaboration issues, CRM and CX are generating a new customer, and EA will reduce costs for organizations. IDC's *Japan Applications and Customer Experience Strategies (Japanese Version with Key English Language Reports)* service is designed to provide detailed analyses and essential guidance to vendors and channels competing in the UC/collaboration/CRM/EA/CX market in Japan. In 2022, this service will enhance research for the customer experience intelligence with AI and data analytics, which will strengthen customer engagement and new solutions for "digital workplace."
