

# SIEM and Vulnerability Management

AN IDC CONTINUOUS INTELLIGENCE SERVICE

IDC's *SIEM and Vulnerability Management* service covers security software and hardware products related to security information and event management (SIEM) and vulnerability management (VM) platforms. Specific functions covered include device and application vulnerability management, SIEM, attack surface management, breach and attack simulation/security validation, and automated red teaming. The service is designed to create in-depth coverage of analytics tools used in the security operation centers.

## Markets and Subjects Analyzed

- Application vulnerability management
- Device vulnerability management
- SIEM
- Attack surface management
- Breach and attack simulation/security validation

## Core Research

- Application Vulnerability Management Market Share
- Device Vulnerability Management Market Share and Forecast
- SIEM Market Share and Forecast
- SIEM IDC MarketScape
- Attack Surface Management and Breach and Attack Simulation Forecast
- SIEM and Device Vulnerability Management User Survey
- Market Analysis Perspective

In addition to the insight provided in this service, IDC may conduct research on specific topics or emerging market segments via research offerings that require additional IDC funding and client investment. To learn more about the analysts and published research, please visit: [SIEM and Vulnerability Management](#).

## Key Questions Answered

1. Who are the major players in the SIEM market?
2. Who are the major players in the vulnerability management space?
3. What is the size and market opportunity for SIEM solutions?
4. What is the size and market opportunity for device vulnerability assessment solutions?
5. How has the competitive landscape changed through digital transformation and adoption of cloud and enabling technologies?

## Companies Analyzed

This service reviews the strategies, market positioning, and future direction of several providers in the security market, including:

AttackIQ, Censys, Checkmarx, Cisco, Contrast Security, CrowdStrike, CyCognito, Cymulate, DAS Security, Devo, Exabeam, Elastic, Fortinet, Google, HCL Technologies, Help/Systems, IBM, Ivanti, LogPoint, LogRhythm, Mandiant, Mend, Micro Focus, Microsoft, NSFOCUS, Palo Alto Networks, Pentera, Picus Security, Positive Technologies, Qi An Xin Group, Qualys, Rapid7, RSA NetWitness, SafeBreach, Securonix, ServiceNow, Skybox Security, Snyk, Sonatype, Splunk, Sumo Logic, Synopsys, Tanium, Tenable, Trellix, Venustech Group, Veracode, XM Cyber, and Zoho.
