Europe: Future of Work
AN IDC SPECIAL INTELLIGENCE SERVICE

This advisory service provides a holistic view on how technology is changing the way we work. Leveraging IDC’s Future of Work framework, it focuses on analyzing technology driven transformation in the workforce, workspace, and work culture. It looks at the impact of IDC accelerators such as IoT, AI, Robotics, and AR/VR on how work gets done. Designed for both technology providers and buyers, it provides guidance on technology selection and implementation, as well as vendor assessment. Tech buyers will benefit from advice and concrete examples of how they can leverage technology to successfully navigate their workplace transformation strategies and thrive in the "next normal." Vendors will benefit from guidance in their product road maps and go to market strategies.

Markets and Subjects Analyzed
- Defining work in the next normal
- The digital workspace
- Agile working and the reconfigurable workforce
- Managing and measuring employee experience
- Automation and intelligent technologies unlocking productivity
