

China Semiannual Accelerated Server Tracker

Artificial intelligence infrastructure refers to the special IT infrastructure equipment used to support artificial intelligence software platform and application. In this tracker, it refers to the server equipment of accelerated computing technology.

Technology Coverage

This tracker provides total market size and vendor share for the following technology areas. Measurement for this tracker is in units, vendor revenue, and value.

Core Coverage

- | | |
|------------------------|---------------------------|
| • Year | • Accelerator Capability |
| • Vendor | • Rack Factor |
| • Accelerator Category | • IDC Local Industry (16) |
| • Interconnect | • Accelerator Model |
| • Model Name | • CPU Type |
| • Accelerator Brand | • Socket Capability |
-

Geographic Scope

- PRC
-

Data Deliverables

This tracker is delivered on a semiannual basis via a web-based interface for online querying and downloads. Deliverables for this tracker are listed below. For a complete delivery schedule, please contact an IDC sales representative.

- Historical data
 - Forecast data
 - PPT report
 - Face-to-face communication with analysts
-

Forecast Coverage

Forecasts for this tracker are updated semiannually and include years of historical data, years of quarterly forecasts, and additional years of annual market projections. Forecasts are available at the country levels. Examples of the forecasts included in this tracker are as follows:
