

IDC Financial Insights: Asia/Pacific Financial Services IT Strategies

IDC Financial Insights: Asia/Pacific Financial Services IT Strategies offers a focused look at the Asian financial services sector (primarily, banks and insurers) and provides decision makers with a comprehensive array of actionable information, including business model analysis, market entry strategies, competitive positioning, information technology trends, and market forecasts. This advisory service helps financial institutions and technology providers that operate within Asia/Pacific to grow their businesses, maximize returns, and boost customer retention. Our in-country advisors actively engage with management teams to identify market opportunities and provide strategic guidance. The research agenda follows opportunities from bank and vendor perspectives, providing senior-level decision makers with timely market insights into the business opportunities within this dynamic part of the world.

Approach

This service develops an in-depth analysis of key trends in both the corporate and the retail banking sectors in the Asia/Pacific region as well as in insurance, based on ongoing communication with banking practitioners, industry experts, and product and service vendors. At any given year, the analysts complete 250 C-level interviews with leading financial institutions in the region. Our analysts work with subscribers to map out the research agenda for the year and are also available to provide ad hoc advice to help banking executives and vendors make informed decisions. In addition to ongoing research reports, our research advisory service provides analyst access, web conferences, and exclusive admission to financial services-related roundtables and content-rich conferences such as the annual Asian Financial Services Congress and the Fintech Innovation Summits.

Topics Addressed

Throughout the year, this service will address the following topics:

- Key technology spending priorities in Asia/Pacific banks and insurers
 - Best practices and business models for banks in the 12 key markets in Asia/Pacific
