Finalists Named in IDC’s Inaugural Best in Future of Digital Infrastructure North America Awards

NEEDHAM, Mass., September 14, 2021 – International Data Corporation (IDC) today unveiled nine finalists for its inaugural IDC Future Enterprise Best in Future of Digital Infrastructure North America Awards, which are designed to highlight companies demonstrating excellence in using digital infrastructure to transform business and foster innovation. IDC received submissions from across North America for this first annual award program. Award winners will be announced September 28th and showcased at CIO’s Future of Cloud and Digital Infrastructure Summit being held December 7–9, 2021. To learn more about these annual awards, please visit HERE.

Awards are being given to the best entrants in three categories. The finalists in each category are:

Cloud-Centric Computing

• Tapestry – Digital Core Transformation
• Siemens Healthineers – Transformation with Hybrid Cloud
• Analytical Biosciences – Big Memory Accelerates Single-Cell RNA Sequencing

Ubiquitous Deployment Strategies

• Toyota Financial Services – Digital Infrastructure Transformation
• Indicio Network – Indicio Network

Autonomous Operations

• Founders Federal Credit Union – Transform Its Data Center and Cyber Resilience Strategy with Dell Technologies
• Walgreens Boots Alliance – Partners with Digitate to Accelerate Digital Transformation and Elevate Customer Experience
• Northbridge Financial – Northbridge Financial: Future of Digital Infrastructure
"The success of digital business depends on resilient digital infrastructure that can scale and adapt to meet rapidly changing requirements, while maintaining security, compliance, and performance SLAs," explained Mary Johnston Turner, research vice president, Future of Digital Infrastructure at IDC. "The finalists in our first annual IDC Future Enterprise Best in Future of Digital Infrastructure North America Awards represent forward-thinking organizations that have harnessed the power of ubiquitous cloud native infrastructure technologies deployed across on-prem, edge, and public cloud platforms using intelligent autonomous operations to fundamentally transform core business strategies and create competitive business advantage."

About IDC's Future of Digital Infrastructure Research Practice

IDC's Future of Digital Infrastructure research practice helps organizations prepare for the emerging digital infrastructure ecosystem, which will increasingly be built on a cloud-centric foundation. Organizations will need to focus on ensuring ever faster delivery of innovative infrastructure hardware, software,
resource abstraction, and process technologies to support the development and continual refinement of resilient digital services and digital experiences.
