What is an IDC FutureScape report?

An IDC FutureScape report presents the top technology predictions for the coming 1–5 years in a particular focus area — written from a worldwide, regional (Asia/Pacific), or country-level view (China, Japan). Each report translates IDC's market intelligence into actionable guidance, helping technology and business leaders shape their priorities, roadmaps, and investment decisions to achieve desired business outcomes.

Who it's written for

Line-of-Business executives, CIOs, IT directors, IT managers, IT architects, and other IT buyers.

Accompanying versions exist for technology suppliers building their brand story around these prediction statements.

Why technology suppliers should care

- **A narrative anchor.** Build marketing and thought leadership around IDC's data-backed predictions for the next 12–60 months.
- **Demand creation fuel.** Prediction statements are highly promoted across IDC channels, giving your campaigns a recognized third-party frame.
- **Account alignment.** Coverage spans industries, executive personas, and technology domains.
